Basic Information

- Place of Origin: China Guangzhou
- Brand Name: LZR
- Certification: CE
- Model Number: P6
- Minimum Order Quantity: 1
- Price: confer
- Packaging Details: Standard export packing
- Delivery Time: 5-8days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Piece/Pieces per Month

Product Specification

- Name: Picosecond Laser Machine
- Screen: 12inch
- Other Name: Picosercond Laser
- Rf Frequency: 2M
- Energy Density: $\leq 0.6 \text{ J/cm}^2$
- Laser Power: 2700W
- Spot Size: 2-10 Mm
- Wave Length: 1064nm, 532nm
- Touch Screen Size: 12 Inch
- Highlight: 110V Picosecond Laser Machine,
60Hz Picosecond Laser Machine,
Pico Laser Device 2700W

Product Description

110v±10% 60Hz Picosecond Laser Machine With Spot Size 2-10 Mm And Energy Density $\leq 0.6 \text{ J/cm}^2$

Product Description:

One of the standout features of the Picosecond Laser Machine is its aiming beam, which is a diode 655 Nm (Red) that is adjustable and can be turned on or off as needed. This allows for greater precision during treatments, which translates to better results and fewer side effects.

The device also has a high rf frequency of 2M, which means that it can deliver treatments quickly and efficiently. This is particularly important for busy clinics or salons that need to see multiple clients in a day.

When it comes to the wavelengths that the Picosecond Laser Machine can deliver, it is capable of emitting both 1064nm and 532nm. This versatility means that it can be used to treat a range of skin types and concerns, giving clients greater confidence in the results they can achieve.

Another key feature of the Picosecond Laser Machine is its 12 inch touch screen size. This large display makes it easy for practitioners to navigate the device and select the appropriate settings for each client's unique needs.

Finally, the Picosecond Laser Machine has an energy density of $\leq 0.6 \text{ J/cm}^2$, which ensures that treatments are safe and effective, without causing unnecessary damage to the skin.

In summary, the Picosecond Laser Machine is an excellent choice for clinics or salons looking to offer safe and effective laser treatments to their clients. With its adjustable aiming beam, high rf frequency, versatile wavelengths, large touch screen, and safe energy density, this DPL Laser Machine delivers impressive results with minimal risk of side effects.

Features:

Product Name: Picosecond Laser Machine

Other Name: Picosercond Laser

Feature: Skin Tightening, Tattoo Removal

Rf Frequency: 2M

Touch Screen Size: 12 Inch

Screen: 12inch

Technical Parameters:

Screen	12 inch
Touch Screen Size	12 inch
Spot Size	2-10 mm
Energy Density	$\leq 0.6 \text{ J/cm}^2$
Rf Frequency	2M
Wave Length	1064nm, 532nm
Voltage	AC220v $\pm$ 10% 50Hz, 110v $\pm$ 10% 60Hz
Feature	Skin Tightening, Tattoo Removal
Laser Power	2700W
Other Name	Picosecond Laser

Applications:

Skin Tightening: The LZR P6 is perfect for people who want to tighten their skin. It can be used to treat wrinkles, fine lines, and sagging skin. The machine works by penetrating the skin with short pulses of laser energy, which stimulate collagen production in the skin. This results in firmer, smoother, and more youthful-looking skin.

Tattoo Removal: The LZR P6 is also an excellent choice for people who want to remove tattoos. The machine is capable of delivering short pulses of laser energy that break down the ink in the tattoo. Over time, the body's immune system removes the broken-down ink, resulting in a gradual fading of the tattoo.

Superpicosecond Freckle Machine: The LZR P6 can also be used to remove freckles. The machine operates at a superpicosecond

speed, which means that it can break down the pigmentation in freckles without damaging the surrounding skin.

810 Skin Rejuvenation Machine: The LZR P6 can also be used as an 810 skin rejuvenation machine. The machine emits a beam of laser energy that is absorbed by the skin, stimulating the production of collagen and elastin. This results in smoother, firmer, and more youthful-looking skin.

IPL Laser Beauty Machine: The LZR P6 can also be used as an IPL laser beauty machine. It emits intense pulses of light that penetrate the skin, stimulating the production of collagen and elastin. This results in smoother, firmer, and more youthful-looking skin.

Overall, the LZR P6 Picosecond Laser Machine is a versatile device that can be used for a variety of skin treatments. Its powerful laser, dual wave lengths, and 12-inch screen make it a top-of-the-line device that is perfect for professionals who demand the best.

Customization:

Our Picosecond Laser Machine is made in China Guangzhou and operates on AC220v±10% 50Hz, 110v±10% 60Hz voltage. Its features include skin tightening and tattoo removal, making it a versatile addition to your business.

Take advantage of our product customization services to tailor your machine to your specific needs. Whether you need fractional infrared laser skin tightening, DPL Laser Machine, or other modifications, we can help. Contact us today to learn more about our customization options!

Support and Services:

The Picosecond Laser Machine is a cutting-edge technology designed for various laser applications. Our technical support and services for this product include:

Installation and setup

Training and education on machine operation

Maintenance and repair services

Upgrades and customization options for specific needs

24/7 customer support for any questions or concerns

We are committed to providing high-quality technical support and services to ensure the optimal performance of our Picosecond Laser Machine.

Packing and Shipping:

Product Packaging:

1 Picosecond Laser Machine

1 Power Cord

1 Foot Pedal

1 User Manual

1 Pair of Laser Safety Goggles

Shipping:

Shipping Method: Standard

Shipping Time: 5-7 business days

Shipping Cost: Free

Shipping Restrictions: This product can only be shipped within the United States

FAQ:

Q: What is the brand name of this laser machine?

A: The brand name of this laser machine is LZR.

Q: What is the model number of this laser machine?

A: The model number of this laser machine is P6.

Q: Where is this laser machine manufactured?

A: This laser machine is manufactured in China Guangzhou.

Q: What is the wavelength of this laser machine?

A: The wavelength of this laser machine is 532nm.

Q: What type of laser does this machine use?

A: This laser machine uses a picosecond laser.
